About the Minnesota Office of Higher Education

The Minnesota Office of Higher Education is a cabinet-level state agency providing students with financial aid programs and information to help them gain access to postsecondary education. The agency also serves as the state's clearinghouse for data, research and analysis on postsecondary enrollment, financial aid, finance and trends.

The Minnesota State Grant Program is the largest financial aid program administered by the Office of Higher Education, awarding up to \$180 million in need-based grants to Minnesota residents attending accredited institutions in Minnesota. The agency oversees tuition reciprocity programs, a student loan program, Minnesota's 529 College Savings Plan, licensing and early college awareness programs for youth.

Introduction

Fall 2013 enrollment at Minnesota's colleges, universities and career schools decreased 2.7 percent (9,892 students) from the previous fall and 4.9 percent from fall 2009, according to preliminary fall headcount figures reported to the Minnesota Office of Higher Education.

There were 5,115 fewer students enrolled at public institutions and 4,777 fewer enrolled at private institutions from the previous fall. Enrollments in career-oriented programs (at public 2-year colleges and private career schools) grew after the 2008 recession as adults, predominantly aged 25 to 44, went back to college for short-term re-training or to seek new career options by furthering their postsecondary education.

The biggest percentage change in enrollment has occurred at private career schools which decreased 17.9 percent from the previous fall and 39.1 percent during the past five years; a decrease of 4,854 and 14,287 students respectively. Private career school enrollments in Minnesota reached their peak in 2009. Enrollment levels are now about the same as they were in 2006. Over a dozen smaller schools have closed during the past five years and those still in operation have enrolled fewer students.

Total fall 2013 headcount enrollment for undergraduates and graduate students was reported at 354,660.

About the Data

The fall census of enrolled students at Minnesota postsecondary institutions appears in this report. Enrollments are grouped by individual institution, institution type, and whether the institution is located inside or outside the Twin Cities metropolitan area. Preliminary fall census data are included only for institutions eligible to participate in a state-funded student financial aid program (the Minnesota State Grant program or SELF Loan program) administered by the Office of Higher Education. This includes all publicly-funded higher education institutions and many non-profit and for-profit institutions.

For each institution, preliminary enrollment from fall 2013 is compared with previously reported preliminary enrollments from fall 2009. Data may vary from previously published reports due to corrections made after the publication date. Data received after these tables are prepared will appear in next year's report.

Preliminary census data may differ from data that appear in the *Basic Data Series* published by the Office of Higher Education or other reports based on student characteristics. Census data received for this report may, in some cases, differ from data received for the student enrollment record data base due to the following reasons:

- Data for the student enrollment data base may not have been provided in time for this report, but a preliminary headcount is obtained verbally to fill in the spreadsheet. The verbal number may be an early estimate only.
- The Minnesota State Colleges and Universities provide end-of-term data for the student enrollment data base, but an early fall census are used in this report.

More detailed data on the characteristics of students enrolled in fall 2013 will be posted on the Office of Higher Education's website in mid-2014.

+ Institutions that are closed.

n/a: institution no longer participates in state-funded financial aid program, or not licensed and is not required to submit enrollment data

Data may have been updated from previously published reports.

Preliminary data may differ from data appearing in the *Basic Data Series*, or other data based on student characteristics. Preliminary data are sometimes based on a verbal census. Data appearing elsewhere are derived from the Office of Higher Education's student enrollment database. In some cases, data received for the database differs from the census data in this report.

Definitions: Institution Type

The Minnesota Office of Higher Education groups postsecondary institutions into the following six types for enrollment reporting.

Community and Technical Colleges comprises 30 campuses offering certificate, diploma and associate degree programs.

State Universities comprises seven state comprehensive universities offering bachelor's degrees and graduate programs.

University of Minnesota comprises five campuses. The Twin Cities campus is the state's land-grant research university, offering bachelor's degrees, professional education, and graduate education through the doctorate. The Duluth campus offers a comprehensive undergraduate and graduate curriculum. The Morris campus offers an undergraduate liberal arts curriculum. The Crookston campus focuses on career and technology based undergraduate programs. Enrollment data for the Rochester campus are reported with the Twin Cities campus.

Private Colleges and Universities are predominately not-for-profit four-year liberal arts or religious institutions. In addition to undergraduate education, some private colleges offer professional education and graduate degree programs in certain fields.

Private Career Schools are predominately for-profit institutions offering only career specific certificates, diplomas, and degrees. While institutions in this group offer mostly programs that can be completed in two years or less, some institutions offer limited career specific bachelor's degree, and/or graduate programs in addition to their shorter programs.

Private Graduate Schools may be not-for-profit or for-profit and offer predominately programs at the master's degree level or graduate professional programs.

Definitions: Metro and Non-Metro

Metro and non-metro indicates location of the institution, not the residential origin of the students.

Metro includes institutions located in the seven county Minneapolis-St. Paul metropolitan area (Anoka, Carver, Dakota, Hennepin, Ramsey, Scott, and Washington).

Non-metro includes institutions located outside the seven county Minneapolis-St. Paul metropolitan area.
