# Cross-Sector Dashboards

Minnesota P-20 Council Meeting  
July 23, 2020

# Guiding Principles for Minnesota

- Include a prioritized set of the highest-leverage indicators of student success across the learner lifespan to allow the P-20 Council to more deeply understand when and how students are getting lost in the transition
- Enable the P-20 Council to assess the state's progress and develop targeted strategies to support meeting the postsecondary attainment goal
- Hold each sector—K-12, higher education, and the workforce—accountable to addressing these gaps and providing support to the districts, schools, and students that need it most

# North Carolina

MYFUTURENC

# North Carolina

## Partners

## Purpose

To **measure progress** across the education continuum and **unite around common goals** as we work collaboratively to **meet the state attainment goal**.

- Which areas of the education continuum are working well?
- Where do we need to focus the most energy and attention?
- How is North Carolina doing compared to other states?
- How can we empower local leaders to drive action in their communities?

## Audience

- 1) State leaders
- 2) Local leaders
- 3) General public

# Measuring Our Progress

TOWARDS OUR GOAL: 2 MILLION BY 2030

Without action, **we are projected to fall short in 2030 by 400,000 individuals** with the skills needed to fill our projected job needs. This dashboard tracks progress toward the 2030 statewide attainment goal, using proven indicators, and establishes benchmarks to show how North Carolina students are performing along the entire education continuum, from NC Pre-K through college and career.

## Without Action, We Will Fall Short

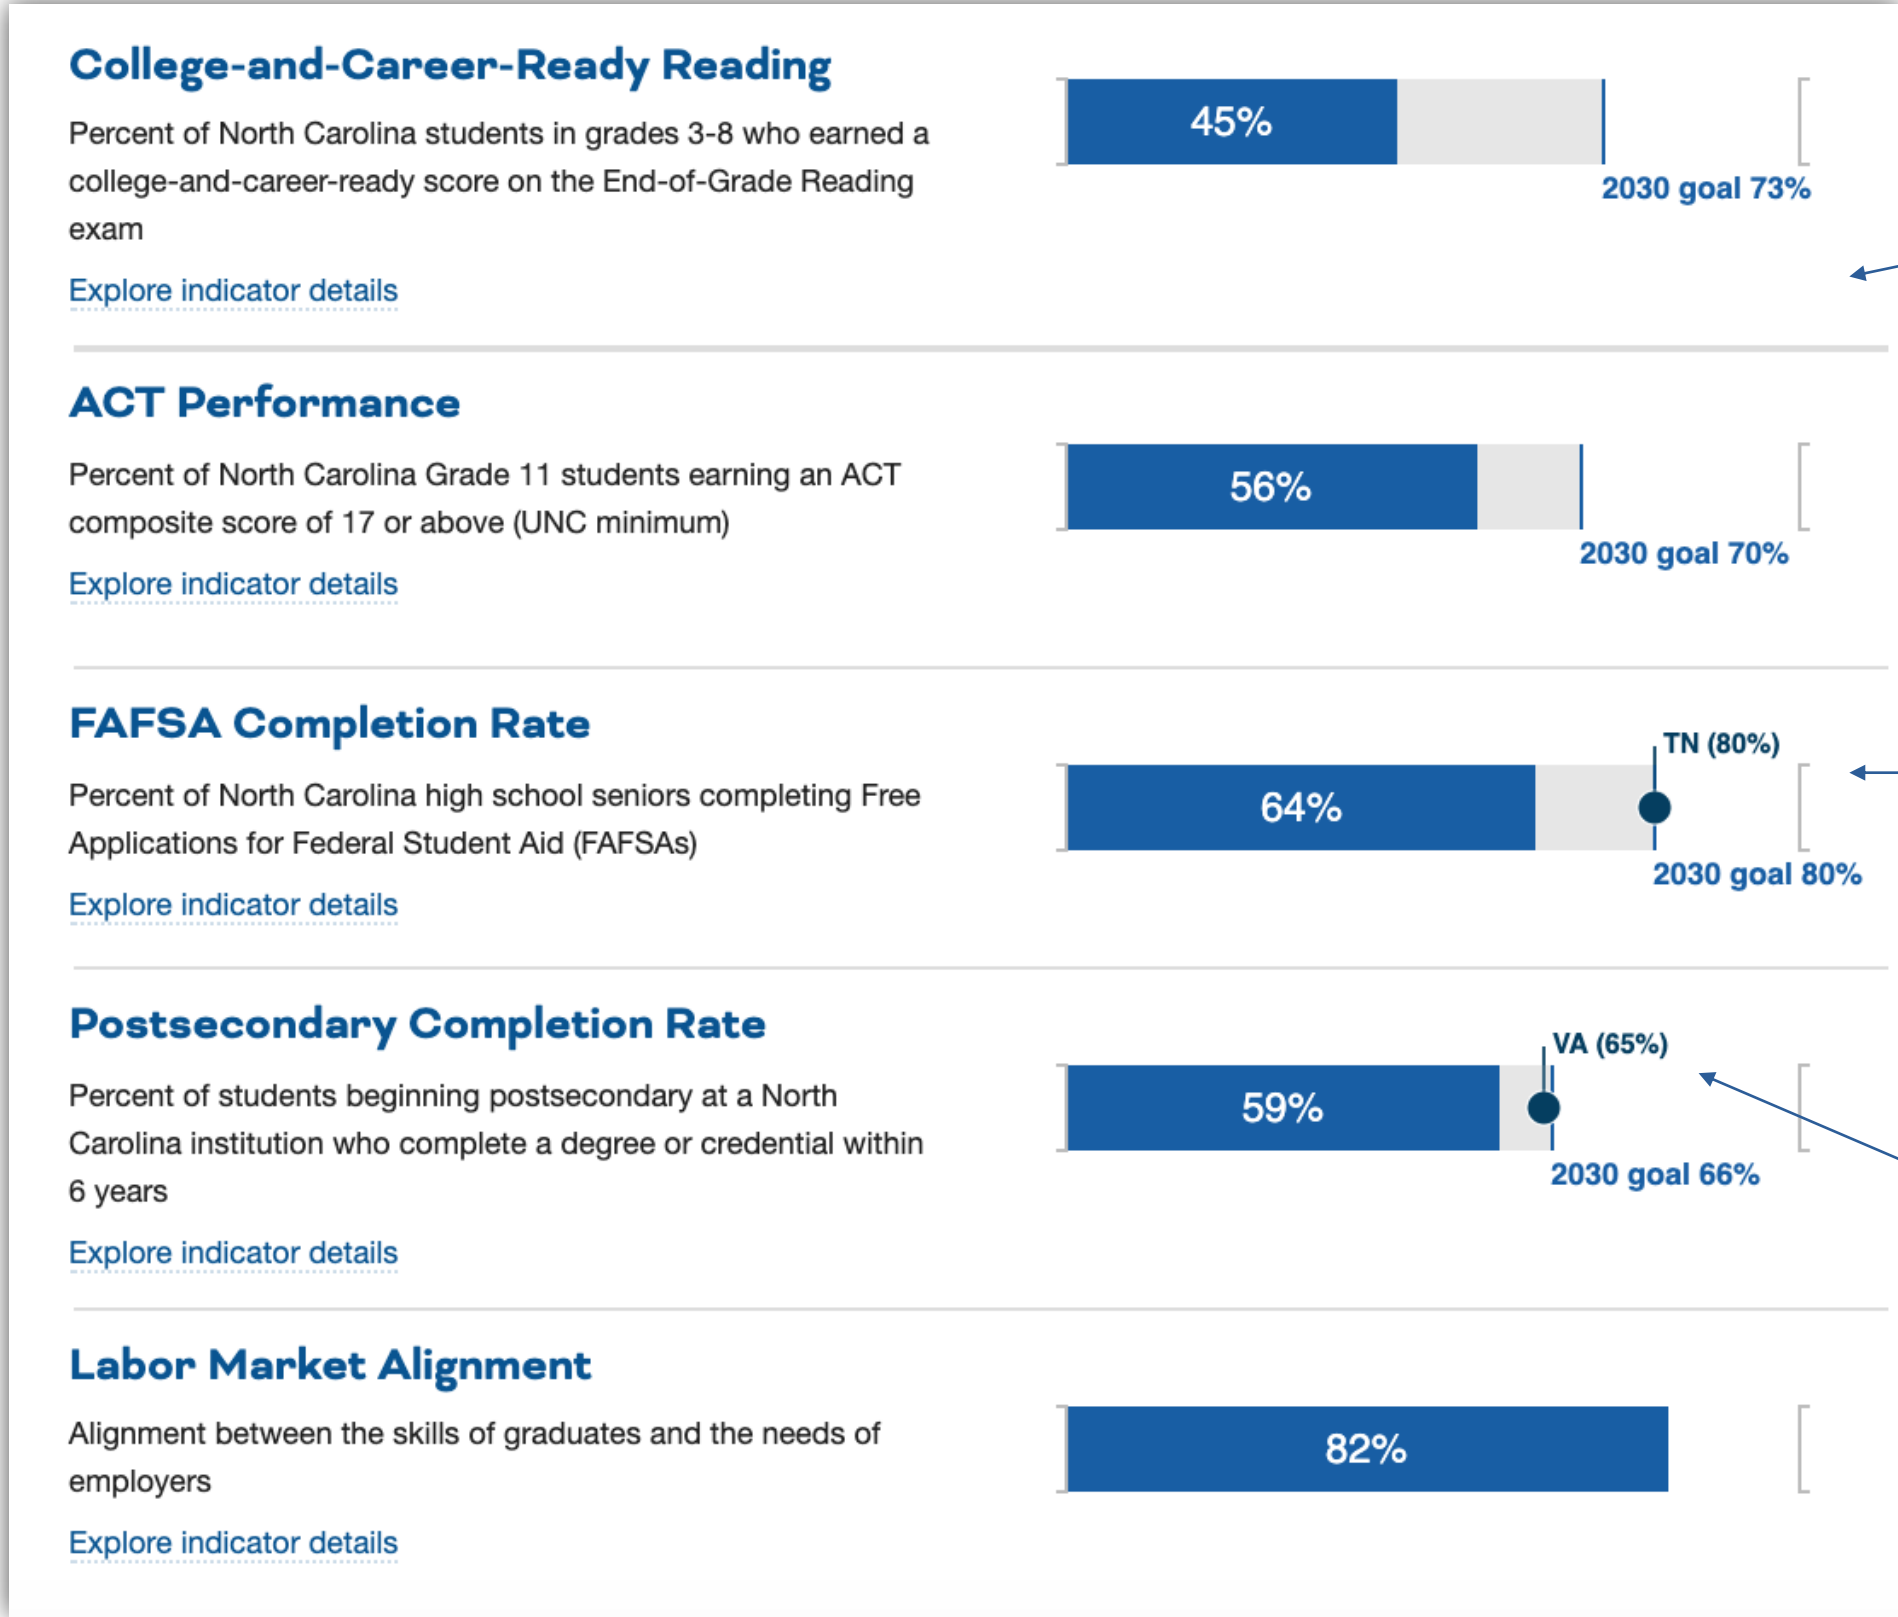

NC DEGREES / CREDENTIALS INDIVIDUALS AGED 25-44

**Prioritizes five indicators (of 18) across K-12, higher education, and workforce on the main page.**

**Sets individual targets for each metric, and shows progress based on current performance.**

**Benchmarks against the highest performing peer state in the South.**

# Postsecondary Enrollment Rate

Percent of North Carolinians 18-24 enrolled in a postsecondary institution

Last updated: 2018

● = Top southern state (not available for all indicators)

## How is Postsecondary Enrollment Rate defined?

Percent of 18-24-year-olds enrolled in college or graduate school.

## What does this data show?

North Carolina's postsecondary enrollment rate is 41%, placing our state 27<sup>th</sup> among all states in 2018. In Virginia, the Southern state with the highest postsecondary enrollment rate, 43% of 18-24-year-olds are enrolled in college or graduate school. Nationally, the state with the highest postsecondary enrollment rate is Massachusetts (53%).

By 2030, the goal is to have 47% of North Carolina 18-24-year-olds enrolled in college or graduate school. This goal was set by the myFutureNC Commission.

## Why does Postsecondary Enrollment Rate matter?

Postsecondary enrollment and postsecondary attainment are tightly linked: enrollment in postsecondary is a necessary precursor to earning a degree or credential.

### Who is working on this in NC?

#### Help improve this section

If you know of an organization that is working on this topic in NC, please let us know [on the feedback form](#).

**Name:** Gear Up North Carolina

**Scope:** National

**Website:** <https://www.northcarolina.edu/gearup>

**About:** GEAR UP NC partners with the College Foundation of North Carolina, ACT Inc., the North Carolina Department of Public Instruction, and the State Education Assistance Authority for statewide dissemination of college information. GEAR UP NC is included in the University of North Carolina System Higher Expectations Strategic Plan as a strategy for promoting and improving access to higher education in North Carolina.

**Name:** College Foundation of North Carolina

**Scope:** Statewide

**Website:** <https://www.cfnc.org/>

**About:** College Foundation of North Carolina (CFNC) is a free service of the State of North Carolina provided by a collaboration of Pathways (the NC Department of Public Instruction, the NC Community College System, the NC Independent Colleges and Universities, and The University of North Carolina System), the North Carolina State Education Assistance Authority, and College Foundation, Inc. CFNC promotes access to North Carolina higher education and assists students with education planning, career planning, and applying to and paying for college.

Allows for deeper dive into each metric.

**Analyzes equity gaps for key subgroups.**

**Trends**

The postsecondary enrollment rate increased during the Great Recession, rising from 38% in 2006 to a high of 42% in 2011. National rates followed a similar pattern, rising from 40% in 2006 to a high of 43% in 2011.

During this period, North Carolina's postsecondary enrollment rate was persistently lower than the national average. The decline in the enrollment rate during the economic recovery has been more pronounced in North Carolina than the national trend, though 2018 data suggests it may be rebounding.

**By geography**

Urban North Carolina counties had the highest postsecondary enrollment rates in 2018 (48%). Suburban (38%) and non-metropolitan rural counties (37%) had similar rates. Postsecondary enrollment rates were lowest in rural counties within a metropolitan area (30%). At the county level, postsecondary enrollment is strongly associated with the presence of a college or university.

**By sex**

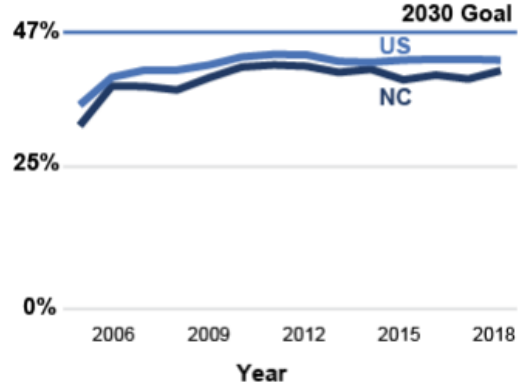

North Carolina women ages 18-24 are more likely to be enrolled in postsecondary than North Carolina men: 47% versus 35%.

**By race/ethnicity**

Asian young adults are most likely to be enrolled in a college or graduate program (57%) and were the only group where more than half of 18-24-year-olds were enrolled in postsecondary. White and black young adults were enrolled at comparable rates (42%), followed by multiracial (39%) young adults. Hispanic (31%) and American Indian (27%) young adults had the lowest postsecondary enrollment rates in 2018.

**Postsecondary enrollment rate remains below 2011 peak**

# Buncombe County

NC goal: 2 million by 2030  
 Overview of postsecondary attainment pipeline

## INTRODUCTION

From birth to career, there are many opportunities to develop strategies and interventions to increase attainment and improve workforce alignment. Below are some key areas and indicators that highlight where interventions may be possible to improve overall educational attainment outcomes.

## COUNTY OVERVIEW

Buncombe County is in the Asheville sub-prosperity zone. It's one of 16 suburban counties in NC. Overall, 50% of 25-44-year-olds in Buncombe County have earned an associate degree or higher, 21% have some college, no degree, and 28% have a high school diploma or less.

|                                  |          |
|----------------------------------|----------|
| <b>2018 Population</b>           | 261,065  |
| <b>2030 Projected Population</b> | 296,961  |
| <b>K-13 Students (2019)</b>      |          |
| Traditional Schools              | 27,741   |
| Charter/Private/Home             | 10,541   |
| <b>Median Household Income</b>   | \$53,960 |

## Building the Foundation: Pre-K to 8

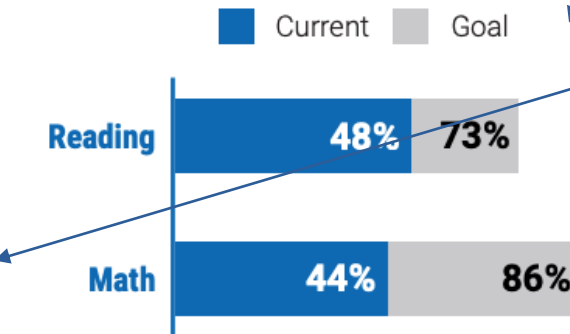

High-quality early learning helps prepare children for future success while academic progress in early school years often predicts later academic challenges.

Buncombe County has 50 public schools with performance grades. Of these schools, 4 or 8% were classified as low performing in 2019.

## How students in Buncombe County traditional public schools are currently doing:

To meet state goals, Buncombe County needs:

- **473 more eligible 4-year-olds** enrolled in NC Pre-K program (goal: 75% enrollment).
- **3,154 more 3-8 graders** earning college-and-career ready scores (level 4 or 5) in reading (goal: 73%).
- **5,357 more 3-8 graders** earning college-and-career ready scores (level 4 or 5) in math (goal: 86%).

## Ready for Postsecondary

High school completion is a crucial step on the pathway to postsecondary success or the beginnings of a career. Activities that prepare students to navigate the transition to postsecondary include gaining experience in college-level coursework and applying for financial assistance.

To meet state goals, Buncombe County needs:

- **181 more 9th graders** to graduate within four years (goal: 95%).
- **454 more seniors** to complete the FAFSA (goal: 80%)
- **767 more students** to attend school regularly (goal: 11% chronic absenteeism).

**Benchmarks current performance with the statewide goal.**

**Quantifies the specific number of students needed to meet goals.**

**Highlights areas of success.**

**Identifies target strategies based on peer performance.**

### **HIGH IMPACT STRATEGIES**

Compared to suburban counties, these three areas represent the biggest opportunities for Buncombe County to improve future attainment outcomes.

#### **Pre-K Enrollments**

35% of Buncombe County eligible 4-year-olds are currently enrolled in NC Pre-K, below the suburban county average of 44%.

#### **Transition to Postsecondary**

58% of Buncombe County seniors enroll in postsecondary within 12 months of graduation, below the suburban county average (62%).

#### **High School Graduation**

87% of Buncombe County 9th graders complete high school in four years, below the suburban county average (88%).

## NC-focused, state-level dashboards

### NC Early Childhood Action Plan Data Dashboards

#### NC Early Childhood Action Plan Data Dashboards

To track progress toward the targets and sub-targets of the 2025 goals in the [North Carolina Early Childhood Action Plan](#), each of the 10 goals of the plan has its own page of data and information. The dashboards are intended to promote collective insight and awareness around the data outlined in the plan. All data will be reevaluated and updated on a regular basis.

### NC School Report Cards

#### NC School Report Cards

North Carolina's school report cards are an important resource for parents, educators, state leaders, researchers, and others, providing information about school- and district-level data in a number of areas. These include student performance and academic growth, school and student characteristics, and many other details.

### UNC System Dashboards

#### UNC System Dashboards

The UNC Data Dashboard is an interactive, online database that gives students, parents, policymakers and taxpayers expanded access to detailed system data on selected core measures.

### North Carolina Community College System Dashboards

#### NCCCS Dashboards

The North Carolina Community College System (NCCCS) dashboards allow users to explore and interact with NCCCS data by theme. The dashboards are designed to help colleges access the data and information needed to facilitate institutional effectiveness and program improvement. Dashboards include system and college-level data views, disaggregations, historical trends, and peer comparisons.

### NC Chamber Dashboard 2030

#### NC Chamber Dashboard 2030

Dashboard 2030 informs dialogue and catalyzes action to address North Carolina's economic development challenges and opportunities. It provides independent and objective data on leading indicators in four critical areas important for state and business competitiveness.

**Links to and defines the purpose of existing state-level dashboards.**

# North Carolina

## Strengths

- Sets specific targets
- Benchmarks against peer states
- Dives deep into the definition, rationale, and performance of each metric
- Examines equity gaps
- Localizes the data through county profiles
- Grounds improvement in specific student counts

## Limitations

- Does not currently enable examination of trends over time
- No user-driven visualization or filtering of data

# Arizona

EXPECT MORE ARIZONA

# Arizona

## Partners

## Purpose

To unite people around a **shared vision** for where we agree we should be as a state, and allow us to **measure progress, celebrate successes, and take action** together.

To **drive meaningful conversation** about the policies and funding that are needed to reach the state's **attainment goal**.

## Audience

- 1) General public
- 2) State and local leaders
- 3) Practitioners

**Focuses on eight priority indicators.**

**TEACHER PAY**

Arizona's median elementary school teacher pay ranks **49th in the nation**, while median pay for secondary school teachers ranks 48th. If we expect student achievement to improve and our communities to thrive, Arizona's teacher salaries must be competitive with other states. Our goal - reach the national median for elementary teacher pay in five years.

LAST UPDATE **12/19**

BASELINE VALUE **52%**

---

## WHY POST HIGH SCHOOL ENROLLMENT MATTERS

PROGRESS IS BEING MADE

WAYS TO TAKE ACTION

METHODOLOGY

---

Far too few Arizona students pursue education or advanced training after graduating from high school.

Arizona currently ranks near the bottom among all states in the percent of high school graduates who continue their education the year after completing high school.

Students who delay enrolling in training or education right after high school do so for a variety of reasons, but those who do delay are at greater risk of never receiving a degree or credential compared to students who enroll immediately after high school graduation.

While a job may certainly be an appealing alternative to paying for more education or training, studies show that not pursuing education or training after high school will cost an individual even more in lost earnings.

Just about any way you look at it – from how much you earn to how much you like your job – individuals with a degree or credential are better off than those without one.

**Uses accessible language to make the case for why each metric matters.**

---

## WHY POST HIGH SCHOOL ENROLLMENT MATTERS

### PROGRESS IS BEING MADE

### WAYS TO TAKE ACTION

### METHODOLOGY

---

**Includes case studies for how programs and initiatives are making progress across the state.**

Through its work with the K-12 system, the **Arizona Board of Regents** is preparing more students to succeed in college and careers. ABOR's [College Going Rate Report](#) breaks out information on how many students attended college according to individual Arizona high schools. The report measures the rate at which students graduated from high school and subsequently enrolled in a post-secondary educational institution the following academic year.

**Arizona GEAR UP** is an innovative college access program with proven success. The numbers tell the story: 73 percent of Gear Up students graduate high school and go onto college – a number that far exceeds the Arizona average. [Learn more here.](#)

## EXPECT MORE EXCELLENCE TOUR

Great things are happening in education in Arizona and we want people to know about them. Countless students, educators, parents and communities are already working to raise the bar. Check out the following examples.

WHY POST HIGH SCHOOL ENROLLMENT MATTERS

PROGRESS IS BEING MADE

WAYS TO TAKE ACTION

METHODOLOGY

The Arizona Education Progress Meter goals are ambitious, but possible. There's a role for everyone to play. Below are a few ideas to get started:

#### Business

- Partner with your local community college to meet your workforce needs
- Focus your charitable giving toward programs or initiatives that advance the Education Progress Meter goals
- Give your employees the flexibility to volunteer in local schools
- Join a school or district's community council
- Host an internship program

#### Local Governments

- Issue a proclamation in support of the Education Progress Meter and statewide goals
- Review your local data
- Set goals for your community
- Use the Education Progress Meter to focus your education initiatives
- Celebrate success stories in your communities at your city or town council meetings
- Link to the Education Progress Meter from your website

#### Policymakers

- Evaluate policy using the Education Progress Meter framework. Make policy decisions

**Provides concrete action steps various stakeholders can take to move the needle.**

# Arizona

## Strengths

- Focuses on a digestible number of priority metrics
- Integrates videos, visuals, and communications toolkits
- Uses accessible language to appeal to a variety of stakeholders
- Showcases examples of programs and initiatives that are making progress

## Limitations

- Doesn't include a metric for workforce
- Doesn't enable a deeper dive into the data
- Doesn't disaggregate by student subgroup
- No localization of the data built into the tool
- No user-driven visualization or filtering of data

# Texas

## Education

Minnesotans have the education and skills needed to achieve their goals

From preschool through college, a great education is the foundation of success for Minnesota's citizens and economy. Learning and experiences gained in educational settings lead to a more skilled, productive labor force as well as personal and societal benefits such as higher wages, better health, and lower unemployment.

Responsibility for education spans local, state, and federal government. The state supports access to quality educational opportunities for people of all ages across the state of Minnesota including: early childhood and pre-kindergarten programming, K-12 public schools, and public higher education at universities, colleges and technical colleges as well as through state financial aid.

This [document \(.xlsx\)](#) provides data for the Education outcome area in table format.

| Indicator  | Recent Progress* | Current Status |
|--|------------------|----------------|
| 49% of Minnesota students are at or above expected growth levels in math.            | Improved         | ◆              |
| 83% of Minnesota students graduated from high school in four years.                  | Steady           | ▲              |
| 60% of adults (age 25-44) have a certificate or higher credential.                   | Improved         | ●              |
| 56% of third graders are proficient in reading.                                      | Steady           | ◆              |
| \$25,521 is the median student debt of graduates with debt from 4-year institutions. | Improved         | ◆              |
